Sep 2020 — Dec 2020

### User Experience (UX), NYU

Feb 2021 — May 2021

### Creative Coding, NYU

Feb 2021 — May 2021

## PROJECTS

### World of Magritte

Oct 2020

This website was my midterm project for my web development class. I created a website dedicated to the works of the artist, Rene Magritte. The website I made was a re-imagination of what traditional art galleries look like. I wanted to change the plain, minimalist concept most art galleries have to fit the surrealist theme of Magritte's paintings.

### Wear Your Mask

Dec 2020

I created this website for my final project in my web development class. This website I created was to explain why face masks became so controversial in the United

States and allow the viewers to educate themselves on how social media played a role in spreading fake news.

### **TinDog**

Mar 2021

This website was a project from my online web development course on Udemy where I mainly explored integrating Bootstrap into designing a website's layout. The site was a spin on Tinder but for dogs. Bootstrap allows for websites to be responsive to changes in the screen size.
